An ambitious, adaptable learner with five years of real-world tech industry experience collaborating in small teams to get things done.

Experience

Product Lead, Wellopp; Toledo, OH — Jan 2016-Present

Wellopp is dedicated to reducing unnecessary hospital readmissions. At Wellopp, I lead the development of our messenger product, an SMS-powered patient outreach tool. I also held the role of “swingman”, fixing bugs in other products, as well as helping the dev ops team administer our microservice architecture.

Sole Proprietor, I Make Websites, LLC; Ypsilanti, MI — Aug 2012-Present

I Make Websites is the company I created for my freelance programming work. This encapsulates all of my experience working solo to meet with clients, discuss project goals, develop timelines, and get things done.

Web Developer, Online Ventures; Brighton, MI — Apr 2012-May 2014

Online Ventures is a technology consultancy that focuses on delivering quality results that improve clients’ business performance. During my time there, I worked on several large projects targeted toward making the operations of non-profit organizations easier, especially datekeeper.org, an event management system targeted toward non-profits.

Education

University of Michigan, Ann Arbor — Fall 2016-Present

Bachelor of Science in Electrical Engineering

Washtenaw Community College, Ann Arbor — Fall 2013-Winter 2016
